## Sort three

P32954\_en

---

Write a procedure

```
void sort3(int& a, int& b, int& c);
```

to sort  $a$ ,  $b$  and  $c$  in nondecreasing order. For instance, if called with  $a = 7$ ,  $b = -3$  and  $c = 1$ , the values after the call must be  $a = -3$ ,  $b = 1$  and  $c = 7$ .

### Observation

You only need to submit the required procedure; your main program will be ignored.

### Problem information
