## Lower & upper

P74495\_en

---

Write a function *lowupp*(*info*) that expects to receive a string; if it starts with the character "^", then it returns the rest of the string in upper case; if it starts with the character "\_", then it returns the rest of the string in lower case; if it starts anyhow else, it returns the string unchanged.

### Scoring

The function counts 100 points

### Sample session

```
>>> lowupp("_Hi There!")
hi there!
>>> lowupp("^Hi There!")
HI THERE!
>>> lowupp("Hi There!")
Hi There!
```
