
Invoices merging

X10098_en

Design a function *fusion_facturas*(*fact1*, *fact2*) which, given two dictionaries *fact1*, *fact2* that associate product names with their price, returns a dictionary associating product names with their price accumulating both invoices *fact1* and *fact2*.

Sample session

```
>>> f1 = {'prod1': 1, 'prod2': 2}
>>> f2 = {'prod1': 1, 'prod3': 2}
>>> fus = fusion_facturas(f1, f2)
>>> if fus != {'prod1': 2, 'prod2': 2, 'prod3': 2}: print(fus)
```
