Even sum X92685_en

Write a function $even_sum(a, b)$ that gets two integers a and b greater than zero and returns the sum of the even integers n that are not multiple of b and $0 < n \le a$. For instance $even_sum(10, 3)$ is 2 + 4 + 8 + 10 = 24.

Sample session

```
>>> even_sum(10, 3)
24
>>> even_sum(15, 1)
0
>>> even_sum(9, 11)
20
>>> even_sum(15, 4)
32
>>> even_sum(15, 2)
0
```
